1. Complainant / Informant Details

Name: Dr. Anil Prakash Menon

Age: 61 years

Occupation: Consultant Cardiologist

Residence: Vyttila, Kochi, Kerala

Mobile: +91 90000 11223

2. Statement of Complaint

"On 15-02-2025 at approximately 4:35 PM, I received a voice call from mobile number +91 91234 56789. The caller introduced himself as 'Arjun Mehta', claiming to be an officer from the bank's digital security and compliance department.

The caller informed me that a SIM/eSIM security verification was pending against my mobile banking profile and stated that failure to complete the verification would result in suspension of my mobile banking and telecom services.

Believing the caller to be a genuine bank representative, I followed the instructions provided over the phone and disclosed a six-digit verification code received by SMS. Within approximately 20 minutes, the cellular network on my mobile handset stopped functioning.

I subsequently contacted my telecom service provider through an alternate telephone number and was informed that an unauthorized eSIM activation had been completed for my mobile number on another device.

Thereafter, I accessed my bank account and discovered several unauthorized electronic fund transfers. The following transactions had been carried out without my knowledge or consent:

- **Txn Ref. 735184620119:** INR 7,75,000 transferred to ICICI Bank A/c No. 62XXXXXX1842 in the name of **Suresh Kumar Rao**.
- **Txn Ref. 735184620764:** INR 6,25,000 transferred to the same beneficiary account.
- **Txn Ref. 735184621308:** INR 9,40,000 transferred through an intermediary payment gateway identified in the transaction narration as **QuickRoute Digital Payments Pvt. Ltd.**

I further noticed that an additional INR 4,60,000 had been debited through an unauthorized UPI transaction shortly thereafter.

The total unauthorized financial loss suffered by me is approximately **INR 28,00,000**.

I state that I did not authorize any of the above transactions, nor did I knowingly request or approve any eSIM transfer. I suspect that unknown persons impersonated bank officials, obtained the verification code through deception, gained control over my mobile number through an unauthorized eSIM swap, and subsequently accessed my banking facilities to transfer funds.

I therefore request that necessary criminal action be initiated against the persons responsible, that the beneficiary and intermediary accounts be traced, and that efforts be made to freeze/recover the fraudulently transferred funds.”
